Pfumelani Rikhotso

IT Graduate

Summary

Motivated IT Graduate with a Diploma in Information Technology and hands-on experience in programming languages such as Java and Python. Proficient in software development principles and eager to apply strong analytical, problem-solving, and communication skills in a collaborative engineering environment while continuously enhancing technical expertise. Committed to contributing effectively to innovative IT projects and developing a robust career in software development and system integration.

Education

Diploma in Information Technology 2019 – 2024

Vaal University of Technology

67%

- Completed coursework in Software Development and Computer Science, achieving a grade of 67%, illustrating a solid understanding of programming languages such as Java and Python.
- Developed a comprehensive grasp of software development principles and lifecycle, enhancing project execution acumen.
- Engaged in collaborative projects, showcasing strong analytical thinking and problem-solving skills within a team-oriented environment.

Grade 12 2018 – 2018

Edward Home High

55%

- Achieved a solid foundation in fundamental subjects including Mathematics and Science, contributing to overall academic development.
- Participated in various school projects and activities that enhanced teamwork and problem-solving skills.
- Engaged in community service initiatives, fostering leadership and social responsibility.

Certifications & Awards

Introduction to Modern Ai 05/05/2026

Cisco

- Completed the Cisco Introduction to Modern AI course, enhancing knowledge of artificial intelligence applications in IT.
- Acquired skills in AI-driven solutions that aid in operational efficiency and advanced troubleshooting.
- Strengthened technical acumen, positioning for future roles in IT and technology-driven environments.

Computer Hardware Basics 2026

Cisco

- Completed the Cisco Computer Hardware Basics course, gaining a comprehensive understanding of hardware components and their

functionalities.

- Enhanced problem-solving skills related to hardware diagnostics and troubleshooting, essential for efficient IT support.
- Positioned for advanced technical roles, leveraging foundational hardware knowledge to improve operational support and system performance.

Introduction to Cybersecurity

2026

Cisco

- Completed the Cisco Introduction to Cybersecurity course, gaining foundational knowledge of cybersecurity principles and practices vital for IT roles.
- Developed skills in threat identification and mitigation strategies, enhancing the ability to safeguard network systems against vulnerabilities.
- Positioned to contribute effectively to cybersecurity initiatives, ensuring robust IT environment security and compliance in future roles.

Working in a Digital World: Professional Skills

2024

IBM

- Completed the IBM 'Working in a Digital World: Professional Skills' course, honing essential digital literacy and professional skills for the evolving IT landscape.
- Developed competencies in effective communication and teamwork, critical for success in collaborative IT environments.
- Enhanced adaptability to digital tools and platforms, positioning for impactful contributions in technology-driven roles.
